

Vanessa Mertins and Max Albert, “Does Participation Increase Outcome Acceptance? Evidence from a Power-to-take Experiment”, Journal of Economics and Statistics, forthcoming.

Data:

The data archive contains all experimental data (*data1.csv* and *data1.dta*). For the panel regressions, an additional data set (*DataPanel.csv* or *DataPanel.dta*) is needed. All variables are described in *variables_MertinsAlbert.pdf*. The exact wording of the experimental instructions and of the survey questions can be found in the Online Appendix accompanying the paper.

Software used:

The calculations are implemented using STATA 13.1.

The do-file with all the analyses (*dofileMertinsAlbert.do*) is available in the data archive.
