This contribution contains information on the data used for the statistical analyses executed in Solveigh Hennig, Gunnar Breustedt, "**The incidence of agricultural subsidies on rental rates for grassland**", Journal of Economics and Statistics 238 (2), Special Issue: Econometric Studies with Integrated Micro-data from German Official Statistics, pp. 125-156.

The analyses are based on data from official farm census surveys and agricultural censuses carried out between 1999 and 2013. Specifically, the AFiD-panel agriculture and surveys from 2010 and 2013 are used. The data are confidential and therefore not part of this contribution. Researchers can obtain access to the farm-level data by applying at the German Federal Statistical Office at <http://www.forschungsdatenzentrum.de>.

In order to include further potential cash rent determinants in the analysis, data from additional external data sources were linked to the surveys. Furthermore, to account for spatial dependencies, we added the coordinates of the central point of each municipality. Information about the data sources is given in the list and the table below.

Additional variables from external data sources:

1. Coordinates of the central point of each municipality
2. Standard gross margins (regional level)
3. Regional payment rates (federal state-level)
4. Biogas density (municipality-level)
5. Soil quality index (municipality-level)
6. Weather data (geo-referenced)
7. Population density (municipality-level)

Data sources of items listed above

Item	Source	Location/contact	Availability
1.	Federal Statistical Office	https://www.destatis.de/DE/ZahlenFakten/LaenderRegionen/Regionales/Gemeindeverzeichnis/Archiv/ArchivReiter.html Filename: „Gemeindeverzeichnis - Alle selbständigen Gemeinden Deutschlands mit ausgewählten Merkmalen im Excel-Format zum Stichtag 31.12.2013“	freely available online
2.	Association for Technology and Structures in Agriculture (<i>Kuratorium für Technik und Bauwesen in der Landwirtschaft, KTBL</i>)	a) http://daten.ktbl.de/sdb/source.do Characteristics („Merkmale“) of land use („Bodennutzung“) and livestock farming („Viehhaltung“) for all regions and years from 2000/01 onwards b) Data of previous years (WJ 1994/95-1999/00) provided by KTBL. Contact: Dr. Norbert Sauer, E-mail: n.sauer@ktbl.de, Phone: +49 (0) 6151-7001-163 The data has been processed prior to the analysis.	partially protected
