

The file “EVS_2008_preparation.zip” contains STATA and R code for the preparation and selection of the EVS data and the files for the regressions. Some of the Data preparation was done in R as a first step. There is a master.do file that contains comments on the right order of the steps in the ensuing Stata analyses.

The file “SOEP Analysen.zip” contains some STATA do files for the descriptive statistics that were prepared for the article using the SOEP dataset. All steps are commented in the master file.
