

Elisa Hofmann, Lucas Kyriacou, and Klaus M. Schmidt, "A Model United Nations Experiment on Climate Negotiations", Journal of Economics and Statistics, forthcoming.

## Data Archive

The Data Archive consists of two folders:

### 1. Data Analysis Results

- Contains the material for results of our experiments as reported in the paper and the appendix.

### 2. Questionnaire

- Contains the material for results of the ex-post questionnaire as reported in the paper and the appendix.

## 1. Data Analysis Results

In the folder Data Analysis Results are stored:

- 1 folder data containing:
  - 1 raw dataset as .csv document: data\_120.csv
  - 14 STATA datasets for the data analysis (7 datasets in STATA12 format and the equivalent 7 datasets in STATA15 and upwards format)
- 1 folder descr containing:
  - 1 data\_readme.txt that describes the datasets
- 1 folder log containing:
  - MUN\_Analysis\_20220302\_STATA12.log contains the log file for MUN\_Analysis\_20220302\_STATA12.do
  - MUN\_Analysis\_20220302\_STATA15.log contains the log file for MUN\_Analysis\_20220302\_STATA15.do
- 2 STATA do files containing the STATA scripts for the data analysis reported in the paper and the appendix:
  - MUN\_Analysis\_20220302\_STATA12.do contains the do file in STATA12 format
  - MUN\_Analysis\_20220302\_STATA15.do contains the equivalent do file in STATA15 and upwards format
- 1 .xlsx document MUN\_Figures\_20220302.xlsx containing the data for the figures and the figures itself. The data for the figures are from the output of the above do files.

## 2. Questionnaire

In the folder Questionnaire are stored:

- 1 folder data containing:
  - 1 STATA12 format dataset MUN\_Questionnaire\_20220302\_stata12.dta
  - the equivalent STATA15 and upwards format dataset MUN\_Questionnaire\_20220302.dta
  - 1 raw dataset as .csv document: MUN\_Questionnaire\_20220302.csv
- 1 folder descr containing:
  - 1 data\_readme.txt that describes the dataset

- 1 folder log containing:
  - MUN\_Questionnaire\_20220302\_STATA12.log contains the log file for MUN\_Questionnaire\_20220302\_stata12.do
  - MUN\_Questionnaire\_20220302\_STATA15.log contains the log file for MUN\_Questionnaire\_20220302.do
  
- 2 STATA do files containing the STATA script for the ex-post questionnaire analysis:
  - MUN\_Questionnaire\_20220302\_STATA12.do contains the do file in STATA12 format
  - MUN\_Questionnaire\_20220302\_STATA15.do contains the do file in STATA15 and upwards format

*Note:* data files, do files, log-files, and results are equivalent to either using STATA12 or the STATA15 format. We provide both formats for downward and upward compatibility.
